

ABDULLAH TARIQ

MERN STACK DEVELOPER

CONTACT

PHONE

0329-2293811

EMAIL

abdullah0645d@gmail.com

LOCATION

Karachi, Pakistan

PORTFOLIO

www.abdullahta.netlify.app

GITHUB

github.com/4bdullahk

LINKEDIN

linkedin.com/in/abdullah-tariq-800977378/

SKILLS

LANGUAGES

JavaScript, C++, Python, SQL

FRONTEND

React.js, Tailwind CSS, Bootstrap, MUI

BACKEND

Node.js, Express.js

DATABASES

MongoDB, PostgreSQL, Firebase

TOOLS

Git, GitHub, Docker, Postman etc.

FOUNDATIONS

OOP · Data Structures · Algorithm Design

CERTIFICATIONS

- Web Development
- Network Essentials
- Database Management and DAA Courses

PROFILE

Motivated Computer Science undergraduate with hands-on experience building full-stack applications using the MERN stack. Seeking a MERN Stack / Software Development internship to bring strong problem-solving skills, clean coding practice, and a fast learning curve to a real engineering team.

EDUCATION

Mohammad Ali Jinnah University, Karachi

3rd Year — In Progress

Bachelor of Science in Computer Science (BSCS)

- ▶ CGPA: 3.88 / 4.00 — maintained top-tier academic standing throughout the program
- ▶ Awarded merit-based academic scholarships (50% and 25%) for consistent academic excellence

PROJECTS

PitchCraft — AI-Powered Pitch Generator

Personal Project

- ▶ Built an AI-driven web app that converts a single idea or product name into a complete UI concept and an investor-ready pitch, using generative AI to automate content and design creation
- ▶ Designed the front-end experience in React and structured backend logic to handle prompt processing and response formatting
- ▶ Tech stack: React, Node.js, Express, MongoDB, Generative AI API

optiMerz — AI-based E-commerce website

Personal Project [In Active Development]

- ▶ Building a full-stack e-commerce platform using React, Node.js, Express, and MongoDB.
- ▶ Integrating AI-driven features to enhance product recommendations and intelligent search query processing.

Algorithm & Data Structure Projects (C++)

Coursework

- ▶ Developed multiple console-based C++ programs applying object-oriented design, core data structures, and algorithmic problem-solving techniques

LEADERSHIP & ACTIVITIES

- ▶ Participated in a university-level hackathon, collaborating under time constraints to design, build, and pitch a working solution
- ▶ Consistently took on the team lead role in academic group projects, coordinating task delegation and ensuring on-time delivery
